

EXPERIENCE

- **Pressbuddy software solutions** Pune, IN
Senior Software Engineer *Dec 2022 - Present*
 - **React Native, ReactJS:** Proficient in React Native and other frontend technologies. Building intuitive and user-friendly interfaces
 - **Backend Development:** Proficient in Node.js, Flask, Django, Laravel, and MySQL. Building robust backend systems to support application functionality
 - **Integration and Enhancement:** Integrating payment gateways, WebSockets, notifications, and analytics for seamless user experience. Enhancing existing projects with additional features and functionality
 - **Deployment and Migration:** Expertise in deploying projects on AWS, Play Store, App Store, and web hosting platforms. Successfully migrating projects from one technology to another or one database system to another
 - **Maintenance and Support:** Ensuring the smooth operation of existing projects. Providing ongoing maintenance, bug fixing, and support to address any issues
- **The Playbook** Pune, IN
Senior React Native Developer *March 2022 - Dec 2022*
 - **App First version Release in 25 Days:** Worked closely with cross-functional teams including designers, product managers, and QA engineers to ensure smooth app development and release. Identified and resolved app issues, including bugs, crashes, and compatibility issues across different device models and OS versions.
 - **User Feedback Integration:** Gathered user feedback and implemented necessary improvements to enhance app functionality and user satisfaction.
 - **Performance Optimization:** Conducted performance profiling and implemented optimizations to improve app speed, responsiveness, and resource usage.
 - **Analytics and Reporting:** Utilized analytics tools to gather insights on user behavior, app usage patterns, and performance metrics, and leveraged data-driven insights to make informed decisions for further app enhancements.
- **Netwin Infosolutions** Nashik, IN
Jr. React native developer *Jan 2021 - March 2022*
 - **E-commerce, ERP, and Mobile App Development:** Experienced in building e-commerce applications, integrating payment gateways, developing location-based ERP solutions, and creating feature-rich mail client apps
 - **Project Planning and Execution:** Evaluated project requirements, estimated resources, and planned milestones. Successfully delivered solutions on time by effectively communicating with clients from different countries.
 - **Deployment and App Store Publishing:** Deployed apps on the Play Store and App Store, adhering to guidelines and ensuring seamless deployment processes.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, PHP, SQL **Cloud:** AWS, Linux (Configuring and Managing)
Frameworks: React Native, Node.js, NextJS, ReactJS, Django, Laravel, Bootstrap, Flask, JQuery, ExpressJS
DevOps and API Tools:: IIS, Nginx, Apache, Git, Docker, Postman
Others:: Data Modeling, Agile (Scrum/Kanban), Design Patterns, Debugging, Root Cause Analysis

PROJECTS

- **Etable Dine in and booking:** digitizing food courts. Enabled menu and table management, online ordering via QR codes, and integrated billing system. Enhanced restaurant profiles with customization options and customer ratings. Streamlined order management and enabled advance hall bookings.
- **Mettle AI:** Developed Mettle AI project utilizing ML, AI, Python, AWS, and EC2 for cost estimation and order management. Integrated 3D printing and CNC manufacturing with secure online payments.
- **Palavi Trust:** Developed a multilingual website for Palavi Trust NGO in Pune using React.js, Bootstrap, PHP, and Laravel. Implemented language switch for seamless content translation and user-friendly experience.

EDUCATION

- **Sanjivani College of Engineering (An Autonomous Institute)** Maharashtra, IN
 1. Master of Business Administration in operations and supply chain management Pursuing
 2. Bachelor of Engineering in Computer Science; CGPA: 8.2 2020
